

ROTARY^{iQ}

Field diagnostics from anywhere

Rotary IQ is compatible with ALL automatic gate operators powered with the Linear Nortek APeX control board. Upgrade your long time customer with a modern solution for remote diagnostics, real time alerts, and interactive troubleshooting to ensure happy customers with minimal downtime.

Visit www.RotaryGateSystems.com to start your account.

ROTARY^{iq}

Field diagnostics from anywhere

Plug and Play connectivity.
Connect to any APeX board
ever installed via the on-board
diagnostic port.

Control and diagnose
from anywhere with
cellular connectivity.

Save time and money by
diagnosing issues from the
office before a site visit. Gas
is expensive, save it when
you can.

Available web app
means the Rotary IQ
system is compatible
with all operating
systems with nothing to
download.

Cloud connected
for easy reference
and retrieval of data.
Dashboard stores up
to 500 event logs.

Email/Text notifica-
tions in real time for
entrapment errors and
alarms.

With Rotary IQ you can now access diagnostic information for all of your customers with Rotary Gate Systems rack and pinion slide gate operators, or any operator using the Linear APeX circuit board. Access and diagnose service related issues, open/close the gate, get real-time entrapment alerts via text message or email, perform basic programming functions, or reset the board from anywhere in the world.
